

PC JEDMICS SETUP

Complete JEDMICS access request form following instructions on the web site. Allow 5 to 7 working days to process.

You will receive your User ID, Password and GDW# via e-mail or telephone. Change password --- after initial login create a unique password that you will not forget.

Download Programs from <http://jtshep.redstone.army.mil>
You must call the helpdesk listed on the above website and identify yourself as a NATEC user in order to access the latest software versions. Download and install PCJEDMICS, ImageR, and IndexR. You can also download the complete PCJEDMICS Users Guide.

Configure PCJEDMICS: Run program. A login screen will appear, ignore this for now. Click the "Options" icon at the top, then the "Server" tab in the new window.

Enter the following information:

Extension: nat
Hostname: dbs1
TCP/IP Address: 159.120.52.102
GDW#: gdw(# provided to you)
Sort Order: 99
Port: 8004
Description: NATEC SGI
Click "ADD"

Click to highlight the information that matches what you just entered (in box under CLEAR and EXIT)
Click "Save as Default"
Exit PCJEDMICS and restart.

At JEDMICS Login screen select host, gdw#, enter UserID and password. Make sure Y2K Enabled is checked then click green check mark.

Note: Once you have configured the server you will not need to do it again, just start at the Login screen

If you experience problems consult PCJEDMICS User's Guide.
